

COLLINSFORD HOLDINGS LTD.

INVESTOR & STRATEGIC PARTNERSHIP DECK

2026

Building Businesses. Connecting Opportunities. Advancing Africa.

Why Collinsford Exists

Across Africa, valuable opportunities can be limited by fragmented markets, weak connections, limited access to strategic support and difficulty turning good ideas into disciplined execution.

Collinsford Holdings Ltd. is being developed to participate in that opportunity by connecting businesses, people, resources, strategy and technology across complementary sectors.

CONNECT People, businesses, markets and resources.	BUILD Businesses and initiatives with long-term potential.
EXECUTE Turn strategy into coordinated action.	SCALE Develop partnerships and systems that can grow over time.

The Collinsford Ecosystem

The group is structured around complementary business areas rather than a single product. This allows strategy, logistics, investment thinking, management and technology initiatives to reinforce one another.

LOGISTICS Movement, coordination and market connectivity.	PRIVATE EQUITY & INVESTMENT Opportunity assessment, partnerships and long-term value creation.
BUSINESS CONSULTING Business development, direction and practical strategic support.	MANAGEMENT Organization, coordination, operational thinking and execution.
PLANNING & STRATEGY Business plans, growth planning, project direction and market entry.	AFRI LIFELINE An initiative exploring Agriculture, Health, Logistics and AI.

Where We See Long-Term Potential

Collinsford's investment approach is intended to be selective and opportunity-driven. Specific investments should be evaluated individually through commercial, legal, operational and financial due diligence.

ESSENTIAL ECONOMY — Logistics and services that help goods, businesses and markets connect.

AFRICAN ENTERPRISE — Businesses and founders addressing identifiable market needs.

TECHNOLOGY — AI-enabled tools and digital systems that can improve productivity and access.

CROSS-SECTOR SYNERGY — Opportunities where logistics, consulting, management, investment or technology can reinforce each other.

This document is an introductory partnership deck, not a public securities offering or a promise of investment returns. Any investment opportunity would require a separate proposal, due diligence and appropriate legal documentation.

A Platform for Practical Solutions

AFRI LIFELINE

A Collinsford initiative exploring practical solutions across four connected areas:

AGRICULTURE

Exploring opportunities around agricultural enterprise, market connections and sustainable food systems.

HEALTH

Exploring research and technology-driven approaches to useful health information and solutions.

LOGISTICS

Exploring better movement, access and connections between goods, businesses and markets.

AI

Exploring AI-powered assistants and tools for productivity, information access and business operations.

The objective is to explore ideas that can become practical initiatives, partnerships or technology-enabled services as the platform develops.

How We Can Work Together

STRATEGIC PARTNER

Bring capabilities, networks, technology, market access or expertise to a defined Collinsford initiative.

INVESTOR

Evaluate a specific opportunity or project with an agreed investment structure, governance and documentation.

CLIENT

Engage Collinsford for consulting, management, planning, logistics or related business services.

PROJECT PARTNER

Collaborate on a defined African-focused project with clear responsibilities, milestones and deliverables.

Our preferred principle is simple: **clear roles, transparent expectations, disciplined execution and shared value.**

From Foundation to Scale

PHASE 1	FOUNDATION	Strengthen the group identity, digital presence, service structure and operating systems.
PHASE 2	VALIDATION	Test priority services and initiatives with real clients, partners and market feedback.
PHASE 3	PARTNERSHIPS	Build strategic relationships and evaluate suitable investment or project opportunities.
PHASE 4	EXPANSION	Scale proven initiatives, strengthen teams and expand useful services across markets.

The roadmap is intentionally progressive: prove value first, then scale what works.

Founder & CEO

Agugu Sopuru Collins

Founder & CEO, Collinsford Holdings Ltd. | RICHIE FX GROUP

An entrepreneur focused on building businesses and initiatives across financial services, logistics, travel, technology and business development. His leadership direction centers on continuous learning, strategic thinking, partnership and disciplined execution.

The Collinsford vision is intended to develop progressively through real market validation, capable partnerships and responsible growth.

What We Are Looking For

Collinsford is open to conversations with individuals and organizations that can contribute capital, expertise, technology, market access, operational capacity or strategic relationships.

CAPITAL — For carefully evaluated projects and growth opportunities.

EXPERTISE — Professionals and operators who can strengthen execution.

MARKET ACCESS — Partners who can open relevant markets, customers or distribution channels.

TECHNOLOGY — Solutions and capabilities that can accelerate digital initiatives and Afri Lifeline.

NETWORKS — Strategic relationships across African and international business ecosystems.

The next step is not a commitment. It is a conversation to understand alignment, opportunity, responsibilities and potential value.
